BONNIN HNOS. S.H.

Bonnin Hnos began as a family dream over 40 years ago with the clear goal of offering our customers high-quality chickens. Coming from a family of breeders, we knew that the key lay in care and dedication at every stage of the process.

Today, with a long trajectory in the industry, our mission remains the same: to maintain excellence in every chicken that leaves our facilities, strengthening our ties with local producers, adapting to the changing needs of the market, and caring for our entire team. We are proud to be part of the productive history of Entre Ríos and to bring the flavor of our chickens to every corner of the country.

Productive and Industrial Area

Our productive cycle has its activities located within less than 50 km; this allows supplying the different productive and industrial areas in a short period of time.

The industrial area includes:

- Slaughtering plant: Production: from 60,000 to 70,000 daily (8,000 chickens/hour).
- Cold tunnels: 210 tn - 100,000 boxes.
- By products plant: it processes about 30 tn of raw material daily.
